Dear Member,

Historically the Board of Directors at Watson Water has held a very frugal line on expenses and customer rates. Because of rising expenses and the cost to supply clean, safe drinking water it has become necessary to increase rates. This letter is to provide notice before the rate modifications take effect. The alterations will go into effect on January 1, 2011.

The current minimum bill is \$9.29 plus tax for 2500 gallons of water usage. Effective January 1st, the new minimum bill will be \$11.08 plus tax for 2500 gallons.

The need has also arisen to adjust some policies and bylaws. For a complete listing of these changes please visit our website www.watson-water.com. The new policies are summarized as follows:

- The new membership fee is \$100
- New Service tap fee is \$1000
- Service Run fee is \$35
- Turn off/on of any existing meter \$50
- Agreements for delinquent bills will no longer be accepted.
- “Floating memberships” will no longer be allowed.
- Requirement for adjustment of leaks has been revised.
- Check return/non-sufficient funds will be a \$25 fee

Again all of these changes will go into affect on January 1st, 2011.

Watson Water has been providing clean, safe drinking water to the community since 1964. In that time our rates have remained among the lowest in the surrounding communities. This increase is only the second in 64 years of service and we at Watson Water are determined to keep rates reasonable and affordable for everyone in our community.

Regards,

Tom King, Board Chairman
